EDUCATION

Vidyavardhini's College of Engineering and Technology, Mumbai, India — Nov 2022

Bachelor of Technology in Computer Engineering **(CGPA 8.1/10)**

Relevant Courses: Flutter App Development, Android App Development, Algorithms, Data Structures, Software Engineering

TECHNICAL SKILLS

Tech Stack: Dart, JavaScript, Python, Java, Kotlin, C++, SQL

Frameworks & Tools: Flutter, Firebase Functions, Node.js, Android Studio, Flask, Git, GitHub, Postman, Selenium

State Management: Riverpod, Bloc, Provider

Databases & Cloud: Firebase, Supabase, MongoDB | REST APIs, JWT Auth, CI/CD (GitHub Actions, Bitbucket Pipelines)

Integrations: RevenueCat, Razorpay, Seats.io, Google & Apple Sign-In, Firebase Cloud Messaging, Native Home Widgets

Platforms: Android | iOS | Web | App Store & Google Play Store publishing

PROFESSIONAL EXPERIENCE

Tracck — Aug 2026 - Present

Founder | Remote

- Founded Tracck, an AI-powered app unifying calorie tracking, habit building, and task management
- Architected and shipped the app end-to-end in Flutter, from product strategy and UI/UX to App Store launch
- Built AI meal logging from photos and voice with calorie and macro estimates, plus personalized meal plans
- Designed a unified Today dashboard with modular trackers, habit streaks, and progress charts
- Drove monetization with RevenueCat subscriptions and localized the app into 11 languages for global reach

WorkState.in — Sept 2025 - Present

Founder | Remote

- Founded WorkState, a digital agency specializing in website and app development, UI/UX, and graphic design
- Designed and developed the WorkState website to help businesses build their online presence
- Collaborate with a team to deliver high-quality digital solutions for individuals and startups
- Help clients establish a unique online identity through custom branding and design
- Lead client projects end-to-end, from requirement gathering and UI/UX design to development and launch

MelodAI — Feb 2026 - Present

Flutter Developer | Delhi

- Developed and deployed 4 production iOS apps to the App Store: MelodAI, CleverNote, CleanMyPhone, and MindScore
- Published MindScore on both the App Store and Google Play Store as a cross-platform Flutter app
- Implemented full subscription lifecycle management using RevenueCat with tiered in-app purchase flows across all apps
- Built an AI-powered note-taking pipeline supporting audio, video, and PDF with multi-language transcription
- Engineered phone optimization features: duplicate photo detection, video compression, and bulk mail cleaning
- Crafted polished, immersive UIs with custom animations and App Store-ready design across all products

7 SEERS — July 2025 - Jan 2026

Lead Flutter Developer | Remote

- Led development of a full-featured cross-platform event app and PotatoBook, an expense manager
- Implemented Google Sign-In, Apple Sign-In, OTP authentication, and payment integration using Razorpay
- Developed native home widgets for Android and iOS
- Collaborated closely with web and design teams to ensure a consistent, high-quality experience across platforms
- Architected the app's core structure, integrated backend APIs, and managed real-time event listings and updates

AppliedPlus **Mar 2025 - July 2025**

Full Stack Flutter Developer | Remote

- Designed and developed a REST API using Python (Flask) and Selenium to automate job applications on platforms like IIMJobs
- Built a cross-platform job search app in Flutter with personalized search and listings from LinkedIn, Glassdoor, Indeed, Cognizant, and more
- Integrated Firebase Firestore for real-time data handling and user-specific operations (bookmarks, applied jobs)
- Implemented Google and Email sign-in authentication along with push notification support
- Gained hands-on experience in mobile UI/UX, full-stack development, API integration, and automation

PROJECTS

Tracck - AI Calorie, Habit & Task Tracker Built with Flutter **App Store**

- All-in-one health and productivity app combining calorie tracking, habit building, and task management
- AI food logging from meal photos or voice commands with calorie and macro (protein, carbs, fat) estimates
- AI-generated personalized meal plans based on the user's calorie and macro goals
- Habit tracking with daily, weekly, and custom schedules, streaks, completion rates, and trend charts
- Task management with due dates, priorities, and recurring tasks
- Unified "Today" dashboard showing habits, meals, and tasks on one screen, with modular trackers
- RevenueCat integration for subscription management and premium AI features
- Localized in 11 languages for a global user base
- Multi-platform support: iOS

PotatoBook - An Expense Manager Platform Built with Flutter **App Store**

- Real-time notifications powered by Firebase Cloud Messaging
- Multiple authentication options: Gmail, OTP verification, Google Sign-In, and Apple Sign-In
- In-app subscription system for premium features and content
- Modern UI/UX with smooth animations and responsive design
- Real-time chat and messaging between users
- Cross-platform support: Android & iOS

MindScore - AI IQ Test & Brain Training App Built with Flutter **App Store | Play Store**

- Science-based IQ test with detailed score breakdown, percentile ranking, and shareable certificates
- 15+ brain training games covering logic, spatial reasoning, planning, verbal skills, and memory
- Games include Sudoku, Tower of Hanoi, Ball Sort, Word Search, Crossword, Memory Match, and more
- Mind Journey progress tracking for test results and skill development over time
- Emotional intelligence (EQ) assessment and cognitive profile insights
- RevenueCat integration for subscription management and premium features
- Localized in 22 languages with multiple difficulty levels
- Multi-platform support: Android, iPhone & iPad

Terran - Event Management & Ticketing Platform Built with Flutter **Portfolio**

- Comprehensive event discovery and ticketing system with real-time seat selection
- Integrated Seats.io for interactive seat mapping and live availability
- Razorpay payment gateway integration for secure ticket purchases
- Multiple authentication methods: Gmail, Google Sign-In, and OTP verification
- Event creation and management tools for organizers
- QR code-based ticket validation and check-in system
- Multi-platform support: Android & iOS
