PROJECTS

MelodAI – AI Music Generator & AI Cover Creation App Built with Flutter LINK **Jan 2026 – Present**

- AI-powered music creation platform that generates full songs from text prompts or lyrics
- Multi-genre AI music generation producing vocals, melodies, and instrumentals automatically
- AI cover generation allowing users to transform songs into different voice styles
- Integrated Firebase backend for real-time data management and user storage
- Multiple authentication methods: Gmail, OTP authentication, Google Sign In, Apple Sign In
- RevenueCat integration for subscription management and premium features
- Push notification system for updates and engagement
- Multi-platform support: iOS

CleverNote – AI Note Taking & Smart Knowledge Assistant Built with Flutter LINK **Jan 2026 – Present**

- AI-powered note-taking platform converting audio, video, PDFs, and YouTube links into structured notes
- Automatic transcription with multi-language support for meetings and lectures
- AI-driven summarization, key highlight extraction, and action item detection
- Interactive AI assistant enabling users to query notes, rewrite content, and generate scripts
- Full-text search and automatic categorization for efficient knowledge organization
- Multiple authentication methods: Gmail, OTP authentication, Google Sign In, Apple Sign In
- RevenueCat subscription integration with premium AI features
- Multi-format export options for sharing and productivity workflows
- Multi-platform support: iOS

CleanMyPhone – AI Storage Cleaner & Device Optimization App Built with Flutter LINK **Feb 2026 – Present**

- Intelligent iPhone cleaning system that scans and removes duplicate and blurry photos
- Video compression feature to reduce storage usage without quality loss
- Bulk email cleaning system for removing spam and unwanted emails
- Contact management tools including duplicate contact detection and merging
- Private Vault for secure storage of sensitive files and media
- Water eject feature using sound vibration to remove moisture from device speakers
- Firebase backend integration for user data and storage management
- Multiple authentication methods: Gmail, OTP authentication, Google Sign In, Apple Sign In
- RevenueCat subscription system for premium features

Terran – Event Management & Ticketing Platform Built with Flutter **August 2025 – Dec 2025**

- Comprehensive event discovery and ticketing system with real-time seat selection
- Integrated Seats.io for interactive seat mapping and live availability
- Razorpay payment gateway integration for secure ticket purchases
- Multiple authentication methods: Gmail, Google Sign In, and OTP verification
- Event creation and management tools for organizers
- QR code-based ticket validation and check-in system
- Multi-platform support: Android & iOS

PotatoBook – A Expense ManagerPlatform Built with Flutter **August 2025 – Dec 2025**

- Real-time notifications powered by Firebase Cloud messaging
- Multiple authentication options: Gmail, OTP verification, Google Sign In, and Apple Sign In
- In-app subscription system for premium features and content
- Modern UI/UX with smooth animations and responsive design
- Cross-platform support: Android & iOS
- Real-time chat and messaging between users

AppliedPlus – A Smart Job Search App Built with Flutter **March 2025 – July 2025**

- Personalized job recommendations powered by user profile and skills ("Best For You" section)
- Auto-filled applications with saved user data for faster job applying
- Google & Email Authentication (Secure sign-in)
- Integrated job listings from multiple sources (LinkedIn, Indeed, Glassdoor, Cognizant, etc.)
- Multi-platform support: Android & iOS Link
